Goals & wishes

I began to study programming with admission to the university (3 y ago), and soon it completely captivated me. Since then I've been looking for topics that captivate me, and devote all my time to them.

Skills

- Programming Languages JavaJavaFx, C++, Assembler, JavaScript, HTML, CSS
- Methodologies Scrum, Cross-platform Development, Object-Oriented Programming
- Graphic Editors Adobe Photoshop, AutoDesk Sketchbook, Balsamiq Mockups

Code examples (LATEST)

1. GitHub LazuRR
2. CodeWars LazuRR

Experience

- BSUIR(Cross-platforming programming) February 2019 - May 2019
- EPAM & BSUIR collaboration
- Developed game Osu!-like on JavaJavaFX

- Custom Observers and Listeners

- BSUIR(software testing and development) September 2019 - December 2019

- Created website MoodTravel
- Worked with Bootstrap 4
- Google API's

English

- English level B1 (I can maintain a conversation on various topics, read and translate simple literature, with preparation - technical)
- 11 classes of English
- Course at the academy of postgraduate education
- Month in Unesco Language Camp, Poland; mentors from around the world.
